

Smart Thermostats

Optimizing Multifamily Deployment

Ben Adams

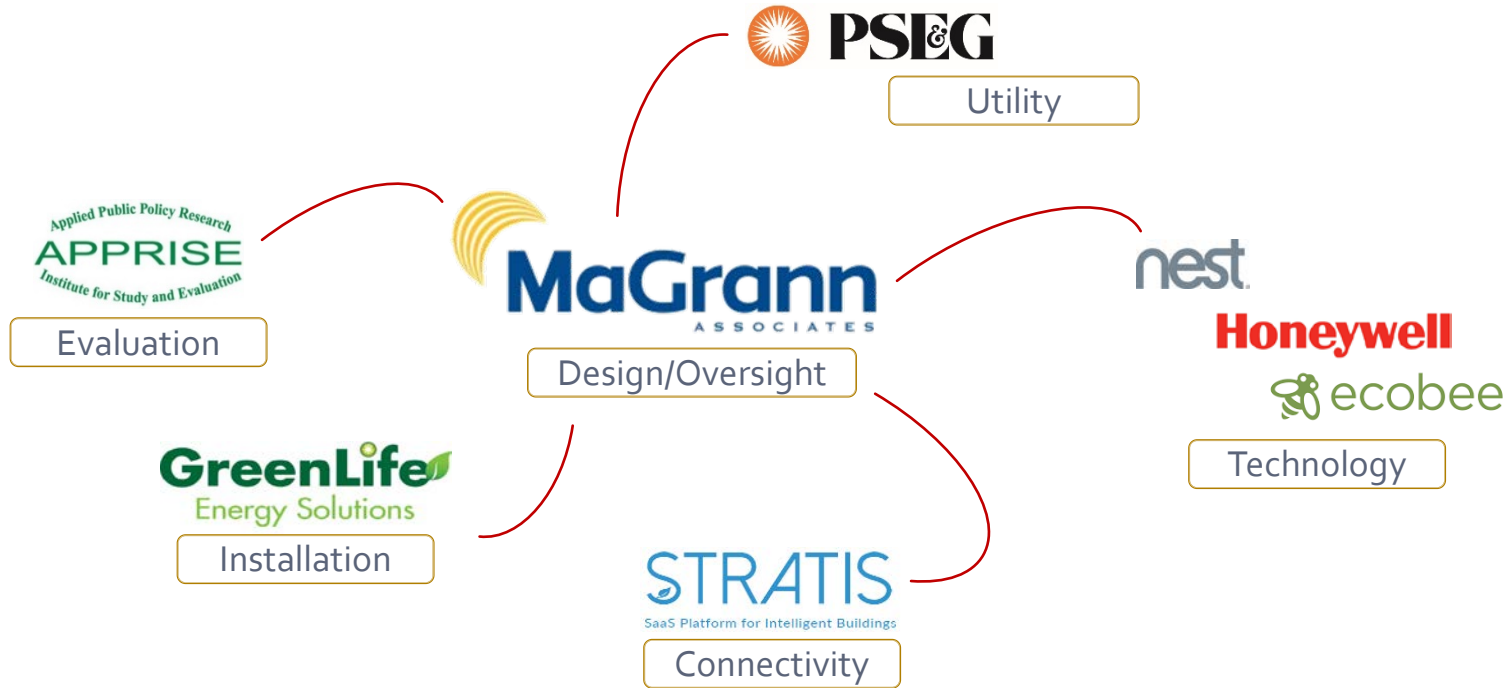

2019 National Home Performance Conference, Chicago IL

Context

- A 942 unit pilot
 - “Lower income” (400% FPL) multifamily rentals
 - Recruitment & installation phases completed
- Determine challenges, lessons learned and impact:
 - Market characterization, recruitment & qualification
 - Technical compatibility
 - Resident & building operator experience
 - Energy savings

Implementation Team

A Broad Representation of Buildings

- 942 thermostats installed in 16 projects
 - 116 units in 2 buildings of 50+ units
 - 307 units in 8 buildings of 20-49 units
 - 65 in 6 buildings of 10-19 units
 - 454 in 73 buildings of < 10 units*

* Based on average units per building; Includes one project where less than 100% of units installed in each building

A Growing Choice of Technologies

LYRIC ROUND THERMOSTAT

HONEYWELL LYRIC T6 PRO

LUX KONO THERMOSTAT
Available Q2 2018

ECOBEE4

GOCONTROL THERMOSTAT

ECOBEE3 LITE

NEST E THERMOSTAT
Available Q4 2018

NEST THERMOSTAT
Available Q4 2018

ZEN THERMOSTAT

Our Pilot Selection

Honeywell Lyric T6
(Z-Wave)

Ecobee 3
(WiFi)

Nest E
(WiFi)

Smart Strategies with Connectivity

- App control

- Geofencing

Both require in-unit connectivity
plus cellular mobile device

* Functionality depends on model/configuration

What is Geofencing?

Smart Strategies Without Connectivity

- Occupancy sensing
With integrated sensor

* Functionality depends on model/configuration

Smart Strategies Without Connectivity

- Occupancy sensing

With integrated sensor

- Learning

* Functionality depends on model/configuration

Multifamily Challenges

WiFi?

Language?

Smartphones?

Turnover?

Occupancy Patterns?

High/Low Temps?

Seniors?

Vacant Units?

A Holistic Approach

Connectivity
+
Building Level Controls
+
Resident Education

Program Advantages Over Tenant WiFi

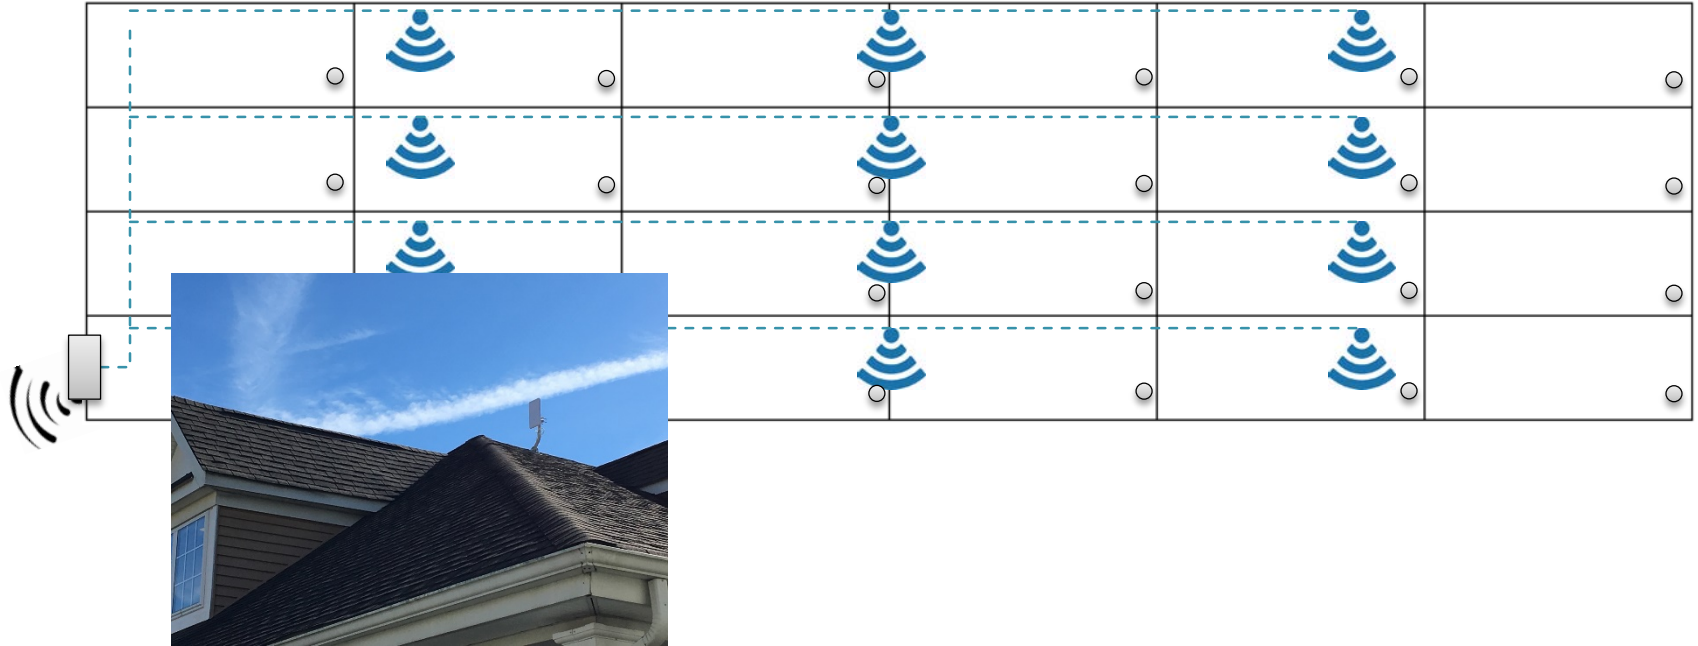

- Participation
 - Not dependent on resident's own connectivity
 - Tenant WiFi availability may be less than 50% depending on market
- Security & cost effectiveness
 - Drastically decreases costs compared to "Hub per unit" deployments
 - Firewalled network infrastructure with Intrusion Detection System (IDS) and Intrusion Prevention System (IPS)
- Property benefits when paired with device APIs
 - Enables dashboard level monitoring & settings
 - Facilitates vacant unit, common area and tenant turnover control
 - Can support other device amenities and resident internet access

Connectivity Solutions: Direct WiFi

Connectivity Solutions: Beamed WiFi

Connectivity Solutions: Mesh/Z-Wave

Connectivity Solutions: Mesh + WiFi

Google

Connectivity Solutions: LoRa WAN

Connectivity Solutions: Tenant WiFi

Solutions broadly represented in Pilot

- 5 Projects (259 units) Nest E with Stratis Wi-Fi
- 5 Projects (231 units) Nest E with tenant Wi-Fi if present
- 3 Projects (226 units) Ecobee 3 with tenant WiFi if present
- 2 Projects (154 units) Honeywell Lyric T6 Z-Wave with Stratis Mesh
- 1 Project (72 units) HW Lyric T6 Z-Wave with Stratis Mesh+LoRaWAN

Compatibility

- Challenges
 - All central systems in older buildings (>20 years)
 - Some individual systems (certain heat pumps, minisplits, PTACs)*
 - C-Wire
 - System condition
- What's worked
 - Newer buildings with individual systems
 - Broad compatibility (conventional, Magic-Pak, hydronic forced air)
 - Creative wiring solutions
 - Few mounting issues

*Other connected thermostat solutions are available but were not included in this pilot

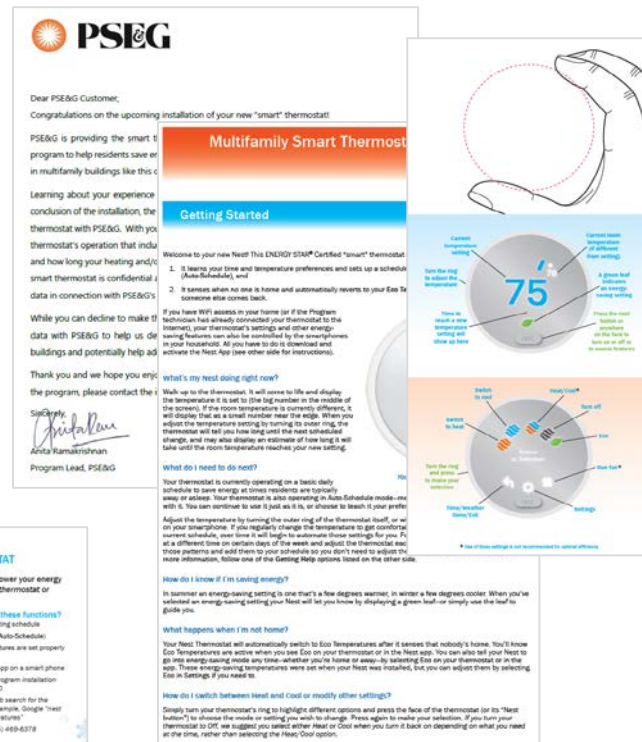

Connectivity

- What's worked
 - Range/flexibility of coverage options
 - Creative solutions for power & ISP access
 - Pre-commissioning of WAPs/thermostats
 - Maintenance staff collaboration

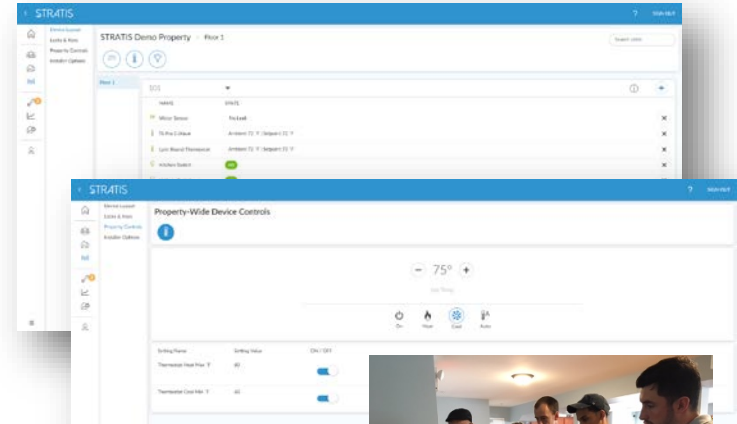

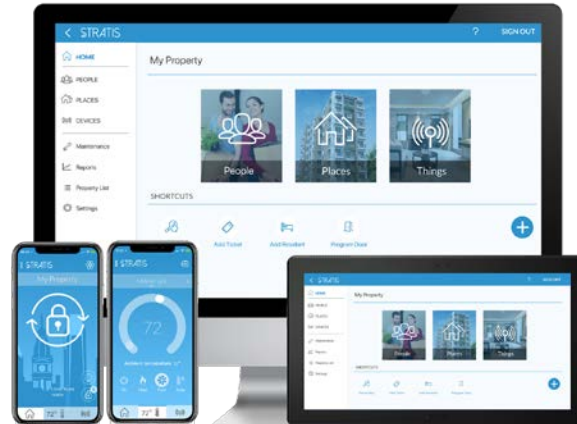

Tenant Experience

- What's worked
 - Advance notice
 - Installer interaction
 - Leave-behind education materials
 - On-site "help desk" during installs
 - Multiple support options
 - Post installation workshops
 - Seasonal tip cards

Property O&M Experience

- What's worked
 - Collaboration at scoping
 - Staff training & advance installs
 - Anticipation of benefits
 - Fewer tenant operation issues
 - Building level support/controls

Market Potential

- Pilot completions
 - Accepted 16 properties (942 units) out of 43 considered (8,281 units)
 - Approx. 37% of properties reviewed (11% of units)
- Pilot rejections
 - Rejected 27 properties (7,339 units)

Rejections	Projects	Units
HVAC compatibility	19	4,787
HVAC age/condition	2	1,404
Withdrawn	6	1,148

- Ultimately, no compatibility rejections due to wiring or mounting issues

Market Potential

Building Size	Eligible Households	% of Total	Potential Units	% Potential
<10 Units	48,733	29%	27,656	57%
10-19 Units	42,751	26%	5,789	14%
20-49 Units	35,634	21%	3,252	9%
50+ Units	39,398	24%	1,257	3%
TOTAL	166,516	100%	37,954	23%
